EDUCATION

B.Tech in Computer Science Engineering — ITMSLS 2024 – Present

CGPA: 7.19/10

Relevant Coursework: Object Oriented Programming, Data Structures & Algorithms, Databases, Discrete Mathematics, Operating Systems, Computer Networks, Machine Learning, Advanced Data Structures & Algorithms, Information Retrieval, Image Processing

Diploma in Computer Science Engineering — ITMSLS 2021 – 2024

Relevant Coursework: Object Oriented Programming, Data Structures & Algorithms, Databases, Discrete Mathematics, Operating Systems, Computer Networks, Advanced Data Structures & Algorithms, Information Retrieval, Data Warehouse

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, PHP, SQL

Frameworks & Technologies: ReactJS, Node.js, Android Studio (Java), MediaPipe, Bootstrap

Databases: MySQL

Tools & Platforms: WordPress, HTML, CSS, Git

INTERNSHIPS

Junior PHP Developer — 8 Time Coding (Remote Internship) Feb 2023 – May 2023

- Developed and maintained web applications using PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript.
- Collaborated with the development team on backend functionality and frontend integration.
- Contributed to database design and query optimization using MySQL.

PROJECTS

Stay_Hard — Android Focus & Productivity App | Java, Kotlin, Android Studio

- Developed an Android application that blocks user-selected distracting apps and requires the user to complete real-time push-up exercises (counted via device sensors) before regaining access.
- Implemented real-time push-up detection using device motion sensors and integrated app-blocking functionality.

Gaming Controller via Hand Gesture Recognition — Desktop Application | Python, MediaPipe

- Built a system-level application that enables users to control games through hand gestures captured via webcam using the MediaPipe framework.
- Implemented real-time hand landmark detection to map gestures to game controller inputs.

JWT Project Management System — Web Application | React.js, Node.js, MySQL

- Developed a full-stack project management tool with role-based access control using JWT authentication.
- Admin users can create projects, assign tasks, and manage employees; employees can update project status through a React.js frontend backed by a Node.js and MySQL server.
